EDUCATION

B.Sc. in Information Systems Engineering
Universidad Internacional del Ecuador (UIDE)
2024 - Present

Technical High School Diploma – Accounting Services
Colegio de Bachillerato Soberanía Nacional
2015 - 2021

INTERESTS

Sports & Fitness (Gym, Football, Basketball)

Reading and continuous learning

Open-source development and collaboration

Music enthusiast

Drawing and creative illustration

CAREER PROFILE

I am a DevOps Engineer with strong experience in cloud infrastructure, automation, backend development, and data-oriented platforms. I specialize in building secure, scalable, and cost-efficient systems, with a strong focus on DevSecOps, DataOps, and cloud-based data processing architectures.

I have hands-on experience designing and operating cloud infrastructure primarily on AWS, with additional exposure to Azure environments. As part of my DevOps role, I have designed and supported infrastructures for processing both small and large volumes of data, enabling reliable data pipelines and analytics workflows. My background in backend development allows me to collaborate effectively with engineering teams and align infrastructure with application and data needs.

I am highly driven by learning and continuous improvement, always seeking new technical challenges that push me to grow professionally. I enjoy working in collaborative environments, proposing solutions, and performing effectively under pressure.

“The more I learn, the more I realize how much there is to learn.” — attributed to Albert Einstein

EXPERIENCES

DevOps Engineer

Mar 2024 - Present

Plika

Design, implementation, and maintenance of cloud infrastructure primarily on AWS, with additional support for Azure-based integrations.

Management and operation of Kubernetes clusters for production and data-intensive workloads.

Implementation of CI/CD pipelines with a strong focus on automation, reliability, and scalability.

Infrastructure cost optimization by analyzing usage patterns, improving resource allocation, and reducing unnecessary cloud spend.

DevSecOps practices: infrastructure hardening, secrets management, and secure access control.

Design and proposal of secure, event-driven data infrastructures including Data Lakes, Lakehouse, and Data Warehouse architectures.

Implementation of Infrastructure as Code (IaC) and monitoring strategies to ensure observability, cost control, and system reliability.

Backend Developer

Aug 2023 - Oct 2024

Plika

Backend development using Python, with a strong specialization in FastAPI for high-performance and scalable APIs.

Development and maintenance of backend services using Django for business-critical applications.

Design and implementation of RESTful APIs, following clean architecture and best practices.

Database modeling, query optimization, and performance tuning.

Integration of backend services with cloud infrastructure, authentication systems, and third-party services.

Data Engineer

Jun 2023 - Aug 2023

Plika

Data pipeline design and implementation.

Data processing and transformation workflows.

Collaboration with backend teams for data integration.

DevOps Consultant (Freelance)

Jul 2022 - Present

Latix

Provision of DevOps and cloud consulting services on an hourly basis for multiple companies.

Design and implementation of cloud infrastructure on AWS, tailored to client-specific requirements.

Kubernetes cluster setup, optimization, and operational support.

Implementation of CI/CD pipelines, automation, and Infrastructure as Code.

Infrastructure cost optimization through right-sizing, resource consolidation, and usage analysis.

Security-focused infrastructure design following DevSecOps best practices.

PROJECTS

 **InstallCursorEditorLinux** (<https://github.com/lsRengel/InstallCursorEditorLinux>)

矢印 | Cursor AI Code Editor, installer and setup in Linux ►

SKILLS & PROFICIENCY

Amazon Web Services (AWS)

Microsoft Azure

Kubernetes

Infrastructure as Code (Terraform)

CI/CD Pipelines

GitHub and GitOps

Python

FastAPI

Django

Docker

Linux and Bash

SQL

Go

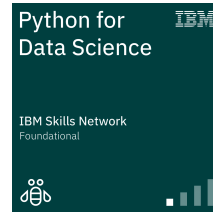

☀ COURSES & CERTIFICATES

AWS Certified Cloud Practitioner

Issuer: Amazon Web Services Training and C...

PROVIDED BY

Python for Data Science

Issuer: IBM

PROVIDED BY

Redesigned by fabidick22 (<https://github.com/fabidick22/hugo-orbit-theme>) from the Pavel Kanyshev (<https://github.com/aerohub/hugo-orbit-theme>) repository.
